# Erratum to: A study of the deterioration of aged parchment marked with laboratory iron gall inks using FTIR-ATR spectroscopy and micro hot table

Stamatis C. Boyatzis\*, Georgia Velivasaki and Ekaterini Malea

**Erratum to: Herit Sci (2016) 4:13**

**DOI 10.1186/s40494-016-0083-4**

After publication of the original article [1], the authors found an error with Table 1, the types of vibrations for sulphates were input incorrectly; i.e.  $\nu_3 \text{SO}_4^{2-}$  should be  $\nu_1 \text{SO}_4^{2-}$  and  $\nu_1 \text{SO}_4^{2-}$  should be  $\nu_3 \text{SO}_4^{2-}$ . Please see the correct table in this erratum (Table 1).
